Profile

Software Engineer with 4+ years of experience building scalable, high-performance web applications using React, Next.js, and Node.js. Proven track record of optimizing frontend and database performance, accelerating feature delivery by 25%, and increasing mobile user retention by 70%. Skilled in translating complex UI designs and design systems into scalable, maintainable full-stack applications with a focus on performance, usability, and business impact.

Professional Experience

05/2025 – Present	Software Engineer, Gracetech Groups - Designed and developed an employee attendance management system integrated with ZKTeco biometric devices, enabling HR and management to monitor employee attendance through a centralized web interface. - Built the React/Next.js dashboard for attendance logs, employee records, check-in/check-out activity, and attendance summaries. - Developed Node.js APIs to synchronize, process, and serve attendance data from biometric devices to the web application. - Designed and optimized database structures and queries for reliable, efficient storage and retrieval of attendance records.	Abuja
06/2023 – 04/2025	Freelance Software Engineer - Built a school management system using Next.js, Node.js, and PostgreSQL for managing students, teachers, classes, attendance, fees, and academic records. - Developed an e-commerce platform with product management, cart, order processing, customer accounts, and integrated online payments. - Built a booking and appointment management system for managing services, availability, customer bookings, and schedules. - Implemented OAuth/JWT authentication, role-based access control, protected APIs, and third-party payment integrations across client applications.	Remote
02/2022 – 05/2023	Web Developer, Brythahub Innovations Center - Developed and maintained production web applications using React, Next.js, TailwindCSS, and Node.js. - Integrated RESTful APIs and GraphQL services to connect frontend applications with backend systems. - Translated Figma designs into responsive, reusable React components, contributing to a 70% increase in mobile user retention.	Abuja

- Implemented authentication and authorization controls to secure application access and user data.

01/2021 – 11/2021

Junior Front-end developer, *Vicsoft Innovations Institute*

Abuja

- Developed responsive, mobile-first web interfaces using JavaScript, HTML5/CSS3, and React.
- Integrated third-party REST APIs and optimized data fetching, reducing average initial page load time by 90%.
- Built reusable UI components and ensured cross-browser compatibility across modern and legacy platforms.

Education

10/2018 – 09/2023

Bachelor of Science in Computer Science,

Enugu, Nigeria

University of Nigeria, Nsukka

- Relevant coursework: Web Development, Database Systems, Software Engineering, Networking
- Built academic projects including a Tour Guide Application and portfolio site

Skills

HTML5, CSS3, JavaScript (ES6+)

React.js, Next.js, Vite

TailwindCSS, Bootstrap

Responsive Design, Accessibility, Cross-Browser Compatibility

Node.js, Express.js

RESTful APIs, tRPC

Authentication (JWT, OAuth)

MongoDB, PostgreSQL, Prisma

Git, Github
